Gator Water Medicator

- Water powered - No need for electricity, runs off water pressure.
- Set ratio of 1:100 or 1:50 - Easy to calculate pre-dilution ratios.
- Chemical bypass - chemicals added after the unit to minimize unnecessary wear and tear.
- All replacement parts available from Think Livestock.
- Professional repairs available

Product Code: GATOR

Select Doser

- Highly accurate - 95%, superior to other variable ratio pumps which often wear out quickly.
- Long lasting with minimal maintenance. Replacing the pump tube effectively renews the pump.
- Several variants available - ask our staff to learn more.
- Replacement parts available from Think Livestock
- Professional repairs available

Product Codes: On request

Select 380 Doser

- Can pump up to 5 litres per hour of additive into the water line.
- Can dose into pressures of up to 70 psi (or 5 bar), which are common with long water lines typical to sheep and cattle farms.
- Works with standard water meters.
- Highly accurate - 95%, superior to other variable ratio pumps, which often wear out quickly.

Product Code: 380 Doser

G5 Doser

- Can pump up to 5 litres per hour of additive into the water line.
- Can dose into pressures of up to 100 psi (or 7 bar).
- Highly accurate - 95%, superior to other variable ratio pumps, which often wear out quickly.

Product code: 360CA-1

Spinstir

- For keeping insoluble additives suspended in stock solutions.
- Works well with any powdered additives.
- Size 100L

Product codes: 211CA00 (Spinstir 10– 240 for up to 100L)

Alphamites DW

SPECIALISTS IN MEDICATION
DELIVERY SYSTEMS
PRODUCTS – ADVICE – SERVICE

Alphamites DW

Alphamites DW is a natural feed supplement that has been formulated to support laying hens during stressful situations such as parasite infestations, disease outbreaks, etc. It has been used extensively by poultry farmers throughout Australia and the rest of the world to help minimise the impact of these stresses, most commonly in flocks suffering from Red Mite infestation.

Natural solution – Alphamites DW is made from plant extracts and, as such, is non-toxic to chickens, the user, and the environment.

Doesn't create resistance.

Dramatically reduced labour – Alphamites DW is administered via drinking water.

Low addition rates – 500mL per 1000 litres of water during use.

Fast acting – You will start to notice results within 1 week.

Cost effective – Cost of use is less than 10 cents per hen per year.

Coxi-stop 25

COXI-STOP™ 25 is added to the drinking water for the treatment and control of coccidiosis caused by Eimeria species including: Eimeria tenella, Eimeria necatrix, Eimeria acervulina and Eimeria maxima.

- Available in 1 litre bottles

Product Code: Coxi Stop 25

Poulvac Newcastle IK vaccine

For the treatment of Newcastle disease

- Available in 500mL bottles

Product Codes: Pigeon Vaccine

Rotavirus Vaccine 30ml

Vaccine for Rotavirus. Please contact office to order (03 54488942).

available in 30ml bottles, contains 100 doses per bottle (0.3ml per dose).

Bio VX Disinfectant

BioVX is a broad spectrum disinfectant, effective against bacteria, yeasts and all known classes of virus. Because of superior dilution rates it is highly cost-effective, works equally well in both hard and soft water and is unaffected by temperature fluctuation.

- Available in: 1 kg & 5kg

Product Code: Bio VX

F10 Super Concentrate Disinfectant

- Highly effective against a broad range of pathogens.
- Available in four sizes: 200mL, 1L, 5L and 25L.

Product Codes: F10 SC 200 - 200mL, F10 SC 1L - 1L, F10 SC 5L - 5mL, F10 SC 25L - 25L.
